

I am writing to express my concern regarding the possible replacement of Low Power FM broadcast service replacing or taking priority over current FM translator service. We are currently enjoying and supporting K-Love signal in the Fresno area, heard on 91.1, 88.3 and 88.5. K-Love provides our community with a positive, family friendly programming which has been a strong and consistent influence on my family and friends. They also provide information regarding local events which keeping us apprised of national news. As many of our friends and neighbors do, we keep K-Love tuned in on both home and car radios, taking them along with us throughout the day. They are clearly one of the best options in radio, and any threat to replacing their signal would certainly have a negative impact on our family and local community. Please keep K-Love on the air with their current broadcasting. Thank you.
